PROFILE

Front-end Developer with proficiency in HTML, CSS, ReactJS, Bootstrap, and Figma. Skilled in Git/GitHub for version control and collaboration. Committed to writing clean, maintainable code following best practices. Excellent problem-solving abilities and passion for creating exceptional user experiences. Seeking internships or part-time opportunities to apply skills, gain industry exposure, and contribute to innovative projects while continuing professional growth.

WORK EXPERIENCE

GSSoC CONTRIBUTOR

GirlScript Summer Of Code May 2024 – Ongoing

Contributed to open-source projects under GSSoC'24, optimizing codebases, enhancing existing projects, implementing new functionalities.

EDUCATION

BE Artificial Intelligence & Data Science

MET_BKC_IOE - Nashik

2022 – 2026

PROJECTS

IoT Based Smart Parking System

Developed a parking management system leveraging IR sensors and Arduino for real-time monitoring of parking spot occupancy and gate operations. Implemented a ReactJS web application hosted on a local server for efficient parking management and data visualization.

Blog Website

Developed a functional blog website with a responsive and modern UI using HTML, CSS, JavaScript, and integrated content management features.

Quiz Application

Quiz generator app with 8 quiz fields, 400-question database, built using HTML/CSS/JS and local storage.

Mini Projects

Text Editor, News App (API), TO-DO List, Profile Card
